DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3653

Claims 2, 6 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the ambiguous term "wherein loosely supported" in line 2.

Claims 2 and 13 identify the size of the "center hole" (line 3) ambiguously. The term "diameter of the center hole" would be acceptable.

Claim 6 states that the leaf springs engage a respective "disk" in lieu of collar (*cf.* claim 5, line 3).

Appropriate correction is required.

Allowable Subject Matter

Claims 1, 3-5, 11, 12 and 14-21 are allowed. Claims 7-10 are objected to but would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number US 6,619,658 B2 by Shiau because of its spring 97,

Patent Number 5,540,423 by Nakano because of its roller unit 4,

Art Unit: 3653

Patent Number 5,031,895 by Couper because of its leaf spring 41, and

Patent Number 4,953,846 by Azeta et al because of its leaf spring 6.
